

## SUMMARY

Frontend Engineer with 10+ years building consumer-facing web applications, including three years on payments and checkout at Just Eat Takeaway.com. Specialised in TypeScript with React, Next.js and Vue across micro-frontend and server-rendered architectures. Integrated 15 payment methods across nine European markets, founded a new payments frontend service, and own error monitoring and conversion analysis for the web payment platform.

## PROFESSIONAL EXPERIENCE

### JUST EAT TAKEAWAY.COM, Amsterdam, Netherlands

Sep 2023 - Present

*global online food delivery marketplace operating in 20+ countries, providing payments and checkout for the consumer web platform.*

#### Frontend Developer/(Sep 2023 - Present)

- Integrated 15 payment methods across nine European markets, including Apple Pay, Google Pay, Amazon Pay, PayPal, iDEAL and local bank schemes, covering saved cards, recurring payments and market-specific rules.
- Founded a new payments frontend service as its first engineer: evaluated and chose the tech stack, built the repository and CI foundations, and shipped the initial release behind a feature flag.
- Owned payment error monitoring for web: built the logging taxonomy mapping frontend payment failures to DataDog dashboards and alerts, and aligned it with the iOS mapping so both platforms alert consistently.
- Led the team's recurring payment-conversion review, analysing success rates by market, payment method and device, and turning drops into prioritised engineering work.
- Diagnosed and fixed high-impact checkout defects across frontend and backend, including an Apple Pay/Google Pay total-amount mismatch and a race condition that blocked Apple Pay for iOS 18 users.
- Delivered features at scale using feature flags and A/B experiments, with analytics instrumentation to measure payment-option and voucher behaviour in production.
- Improved long-term maintainability by retiring three legacy payment code paths without regressing checkout, and wrote the checkout architecture review and onboarding documentation now used across the department.
- Built partner-facing invoicing features — search, filters, bulk export and invoice preview — in a Vue 3 micro-frontend on a shared component library.

### GREENBONE AG, Berlin, Germany

Apr 2023 - Sep 2023

*vulnerability management platform helping companies identify and remediate security gaps in their IT infrastructure.*

#### Frontend Software Engineer/(Apr 2023 - Sep 2023)

- Developed and maintained React web interfaces for Greenbone's vulnerability management products in a cross-functional team.
- Partnered with backend and product engineers on API integration and application performance across the product surface.

### SMAVA GMBH, Berlin, Germany

Jan 2020 - Nov 2022

*one of Germany's largest online comparison portals for consumer loans.*

#### Software Engineer/(Jan 2020 - Nov 2022)

- Built the homepage and landing pages from scratch in React, Next.js and TypeScript, and maintained them in a cross-functional team.
- Owned the offer stage of the loan application journey, the conversion-critical step where users compare and select a loan offer.
- Acted as process lead for the team, coordinating initiatives with management and dependent teams.
- Maintained a domain of interconnected projects together with the development and infrastructure tooling around them.

### BONIFY, Berlin, Germany

Feb 2016 - Nov 2019

*Berlin fintech startup giving consumers free access to their credit score and financial data.*

#### Frontend Developer/(Jan 2018 - Nov 2019)

- Built the customer-facing web application in React and parts of the mobile application in React Native.
- Translated design templates into responsive, accessible UI, working independently as the frontend owner of assigned features.
- Integrated REST APIs in an agile, microservice-based environment, coordinating closely with backend teams on contract changes.

#### Intern, then Junior Frontend Developer/(Feb 2016 - Dec 2017)

- Joined as an intern and was promoted to Junior Frontend Developer, contributing to the consumer web application in React, JavaScript, HTML and CSS.
- Delivered assigned UI features from design templates in a Scrum team, collaborating with design and backend engineers.

## EDUCATION

### UDACITY

React Developer Nanodegree

### UTTAR PRADESH TECHNICAL UNIVERSITY, India

2004 - 2007

Master of Computer Applications

### CHAUDHARY CHARAN SINGH UNIVERSITY, India

2001 - 2004

Bachelor of Computer Applications

## LANGUAGES & TECHNOLOGY

- English(Fluent), Hindi(Native).
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3.
- **Frameworks & Libraries:** React, Next.js, Vue 3, Node.js, Express, Redux, Redux-Saga, React Native.
- **Architecture:** Micro-frontends (single-spa), server-side rendering, Backend-for-Frontend (BFF), REST, GraphQL, microservices, shared component libraries.
- **Payments:** Adyen, Apple Pay, Google Pay, Amazon Pay, PayPal, iDEAL, Open Banking, Twint, Bancontact/Payconiq, EPS, Dankort, meal vouchers, stored credentials and recurring payments.
- **Testing & Delivery:** Jest, React Testing Library, Playwright (multi-market E2E), feature flags, A/B experimentation.
- **Observability & Analytics:** DataDog, Sentry, Snowplow, Tableau.
- **Tooling & Cloud:** Git, GitHub, GitLab, Bitbucket, Vite, Vercel, Docker, AWS, Sanity CMS.
- **Quality:** WCAG accessibility, Lighthouse, bundle and load-time optimisation.

## ADDITIONAL INFORMATION

- Eligible to work full-time in the Netherlands.
- Prior to 2016, taught computer applications at educational institutions in India.
